EDUCATION

University of California, Berkeley

Berkeley, CA

Bachelor of Science in Electrical Engineering and Computer Sciences - GPA: 3.62/4.0

Expected May 2028

RELEVANT COURSEWORK

Machine Learning, Data Structures, Efficient Algorithms, Operating Systems, Database Systems, Computer Architecture, Internet Architecture, Discrete Math, Probability Theory, Linear Algebra, Multivariable Calculus, Circuits & Devices

EXPERIENCE

iPick.ai

Aug 2026 – Present

Software Engineering Intern

Berkeley, CA

- Designed a portfolio analyzer on the Anthropic API that segments a user's holdings into investment tracks and prunes dominated stocks across a universe of **5000+ candidate tickers**
- Engineered a reinforcement learning pipeline that uses realized stock returns as a reward signal to refine future picks
- Implemented a recommendation engine that scores candidate stocks and returns each user's 5 highest conviction buys

Maadhev LLC

May 2026 – Aug 2026

Software Engineering Intern

Cupertino, CA

- Built a custom ACH payment system (Python, Flask, Stripe API) integrated with a Shopify app, enabling bank transfer payments at **70% lower per-transaction cost** than card processing
- Automated order confirmation via Stripe webhook handlers that sync payment and fulfillment data between Stripe and Shopify in real time, eliminating manual reconciliation across every order

iPick.ai

Jan 2026 – May 2026

Software Engineering Intern

Berkeley, CA

- Architected a graph-based company relationship visualizer using React, D3.js, and PostgreSQL
- Extracted supplier and subsidiary relationships across **5,000+ public company tickers**, storing their structured edges in PostgreSQL to power graph-based visualization in the frontend
- Integrated the Anthropic API to generate real-time news summaries, enriching company profiles with live information

Claythis

May 2025 – Aug 2025

Software Engineering Intern

San Mateo, CA

- Created a Unity-based game in C# showcasing Claythis's AI-driven 3D model generation pipeline, implementing core weapon & health systems such as reloading, recoil, animations, armor, and healing
- Validated integration of the AI-generated 3D character models, verifying rigging, animation, and rendering behavior

PROJECTS

Falsetto | Python, PyTorch, Hugging Face Transformers, scikit-learn, Gradio, Modal, librosa

Jul 2026 – Sep 2026

- Developed an AI-generated music detector using MERT embeddings and an attention-based AudioCAT classifier
- Achieved **87.5% accuracy and 0.972 AUC** with an end-to-end ML pipeline, validated by **56 automated tests**

SoccerBoard | Python, JavaScript, XGBoost, PyTorch, FastAPI, Docker

May 2026 – Jul 2026

- Trained a match predictor backtested on **2,500+ matches**, improving outcome accuracy from **47.5% to 59.9%**
- Developed an expected goals model matching StatsBomb's professional benchmark **within 3.2%** of actual goals

SaveBites | JavaScript, Python, React, HTML/CSS

Sep 2025 – Dec 2025

- Built the grocery-tracking backend for a food-waste app that scans receipts to auto-populate ingredient inventory
- Developed a RESTful API for full CRUD on MongoDB ingredient data, fed by an OCR receipt pipeline

TECHNICAL SKILLS

Languages: Python, JavaScript, Java, C#, SQL

Backend: Node.js, Express, Flask, FastAPI, REST

Frontend: React, HTML/CSS, Liquid

ML/Data: XGBoost, PyTorch, scikit-learn, NumPy, pandas

Data/Cloud: PostgreSQL, MongoDB, AWS, Docker

Tools: Git, pytest, JUnit

ACTIVITIES

Vice President of Professional Development | Open Project Berkeley

May 2026 – Present

- Ran resume workshops, mock interviews, and 50+ 1:1 resume reviews for a 300 member consulting club

Soccer Captain | De Anza Force 06B NPL & Monta Vista Varsity Soccer

Aug 2021 – Jun 2024

- Captained my school and club teams, scored 40+ goals over three seasons as 3x All-League and league top scorer

Eagle Scout | Scouts BSA Troop 476

Mar 2017 – Feb 2024

- Led a classroom painting project, managing 15 volunteers, mentored 5 scouts and completed 200+ service hours
